SUMMARY

Software Engineer with 1.5+ year of experience developing full-stack applications using ReactJs, NodeJs, Java and Spring Boot, building secure REST APIs. Completed an international internship in a structured Japanese enterprise environment. Also have hands-on Android development experience using Kotlin and MVVM architecture.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Microservices, REST APIs, JWT, Keycloak, OpenAPI, PostgreSQL, NodeJS, MongoDB
Android: Kotlin, MVVM, Hilt, Room Database, Coroutines, Retrofit, Firebase (FCM)
Frontend: React.js, HTML, CSS, JavaScript, Bootstrap
AI/LLM: Groq API, Llama 3, Google Gemini Embeddings, Pinecone, RAG Pipeline Design
Tools: GitLab, Maven, Android Studio, VS Code, Gradle

EXPERIENCE

Software Development Engineer Nov 2025 – Dec 2025
TechnoProject Co. Ltd. *Matsue, Shimane, Japan*

- Developed secure **Spring Boot backend** services and **REST APIs** with validation and **Keycloak authentication**.
- Implemented a **BFF architecture** that reduced unnecessary API calls and improved response **efficiency by 40%**.
- Delivered enterprise features in a structured **Japanese work environment** following strict documentation standards.

Software Developer Jan 2025 – Oct 2025
Enovate-IT Outsourcing Pvt. Ltd. *Pune, Maharashtra*

- Contributed to the development and maintenance of an Android warehouse management application using **Kotlin**.
- Added new features and resolved production bugs, improving application stability and user experience.
- Worked within an **MVVM-based architecture** and applied **dependency injection** to enhance code maintainability.

Software Developer Feb 2022 – Aug 2022
Go-Live Faster Pvt. Ltd. *Pune, Maharashtra*

- Worked as a Software Developer on an enterprise banking application, developing responsive user interfaces using React.js and building REST APIs using Node.js.

PROJECTS

RAG-Based AI Chatbot | Java, Spring Boot, Groq, Gemini Embeddings, Pinecone

- Built a **RAG chatbot** using Spring Boot and Pinecone to retrieve context from vector embeddings before generating responses.
- Implemented **semantic search with LRU caching** to improve relevance and reduce response latency.
- Developed **REST APIs** to handle user queries, embeddings generation, and vector database interactions.

LaptopHub | Spring-Boot, AngularJs, KeyCloak, PostgreSQL, GitLab, BFF Architecture, OpenAPI

- Developed a secure **Spring Boot backend** using **BFF architecture**, exposing REST APIs for Angular frontend and PostgreSQL integration.
- Implemented **authentication and authorization with Keycloak (OAuth2, OpenID Connect)** using OpenAPI-based contract-driven development.

Warehouse Management Android Application | Kotlin, Firebase, GitLab, MVVM, Hilt

- Built Android features using Kotlin, following MVVM architecture with Hilt-based dependency injection, Retrofit API integrations, and Coroutines for asynchronous operations.
- Designed XML-based UI screens, implemented Firebase Cloud Messaging (FCM), managed fragment navigation, and improved performance through debugging and code optimization.

Prayer Alarm Android Application | Java, AlarmManager, Firebase, MVVM, Hilt, GitLab

- Built an Android prayer alarm app using Java and AlarmManager to trigger scheduled prayer notifications..

ACHIEVEMENTS

JLPT N3 Certified — Intermediate Japanese proficiency for professional communication.
AWS Cloud Practitioner Essentials — Foundational knowledge of AWS services, security, and cloud concepts.
Solved 100+ coding problems on LeetCode, strengthening problem solving and algorithmic skills.

EDUCATION

Indira College of Engineering and Management Pune, Maharashtra
Master of Computer Application *August 2023 – June 2025*
Brihan Maharashtra College of Commerce Pune, Maharashtra
Bachelor of Computer Application *August 2019 – June 2022*
