SUMMARY

Software Engineer with 1+ year of hands-on experience in Java and Spring Boot, leveraging strong Object-Oriented Programming principles to build secure REST APIs and BFF-based backend systems with Keycloak authentication, along with Android development experience using Kotlin and MVVM architecture.

EXPERIENCE

Full-Stack Developer

November 2025 – December 2025

TechnoProject Co., Ltd.

Matsue, Shimane, Japan

- Contributed to backend development using Spring Boot for secure and scalable enterprise applications.
- Built RESTful APIs in Spring Boot with clear separation between controller, service, and repository layers.
- Developed frontend components integrated with a BFF-based backend to enable structured and efficient API communication.

Android Developer

January 2025 – October 2025

Enovate-IT Outsourcing Pvt. Ltd.

Pune, MH

- Added new features and resolved production bugs, improving application stability and user experience.
- Contributed to the development and maintenance of an Android warehouse management application using Kotlin.
- Worked within an MVVM-based architecture and applied dependency injection to enhance code maintainability.

Software Tester

Feb 2022 – Aug 2022

Go-Live Faster

Pune, MH

- Performed manual functional and regression testing for enterprise banking applications serving clients such as Santander Bank and UMB Bank.
- Applied manual testing techniques including Boundary Value Analysis and Equivalence Partitioning to identify defects and ensure requirement compliance.

PROJECTS

LaptopHub | *Spring-Boot, AngularJs, KeyCloak, PostgreSQL, GitLab, BFF Architecture, OpenAPI*

- Designed and developed a secure backend system using Spring Boot with a Backend-for-Frontend (BFF) architecture to streamline communication between Angular frontend and PostgreSQL database.
- Implemented authentication and authorization using Keycloak with OAuth2 and OpenID Connect (OIDC).
- Documented REST APIs using OpenAPI (Swagger) to ensure contract-driven development and improved team collaboration.

Warehouse Management | *Android Studio, Kotlin, Room DB, Firebase, GitLab, MVVM, Hilt*

- Enhanced and maintained an existing Android warehouse application using Kotlin and MVVM architecture.
- Added new features, fixed bugs, and improved stability using Room, Firebase, and Hilt.

Cinescope | *Spring-Boot, Maven, ReactJs, PostgreSQL, JWT, GitHub*

- Built a full-stack movie recommendation system with JWT-based authentication and personalized recommendations.
- Designed RESTful APIs consumed by a ReactJS frontend and managed builds using Maven.

TECHNICAL SKILLS

Backend: Java, Spring Boot, REST APIs, JWT, Keycloak, OpenAPI, PostgreSQL

Android: MVVM, Hilt, Room Database, Firebase

Frontend: React.js, Angular, HTML, CSS, JavaScript

Tools: GitLab, Maven, Android Studio, VS Code, Gradle

EDUCATION

Indira College of Engineering and Management

Pune, MH

Master of Computer Application

August 2023 – June 2025

Brihan Maharashtra College of Commerce

Pune, MH

Bachelor of Computer Application

August 2019 – June 2022
